

The ACIN Camden Center for Entrepreneurship  
in Technology, Together with the New Jersey Institute of  
Technology

## **NJIT: How Small Businesses Can *Still* Play on the Team**

ACIN Defense Contractor Mentor Business Development  
Monthly Program Series 2004

**Wednesday, May 19, 2004 -- 10:00 AM to 1:00 PM**

This series is designed for small businesses interested in doing business with Department of Defense. NJIT's management team will present highlights of several federal, state programs including subcontracting and teaming plus other valuable insights for small business interested in learning how to do business with large prime government contractors-- including appropriate points of contact. The morning briefing will be followed by one-on-one sessions with members of the management team.

**SPACE IS LIMITED - RESERVE NOW**

**RSVP by email. Registration is FREE, and closes at 1 PM on , May 14, 2004.**

**Open to US Citizens only.**

About ACIN:

The U.S. Army's Communications Electronics Command (CECOM) has contracted with Drexel University to operate the **Applied Communication and Information Networking** program (ACIN) in Camden, New Jersey, together with Sarnoff Corporation. The primary goal of the ACIN Camden Center for *Entrepreneurship in Technology* is to enable communications and networking businesses that utilize information technology developed in ACIN R&D projects to be incubated and accelerated onto a rapid commercialization track. A second objective is to attract and

foster growth in private sector companies that are developing new technologies and products to be used in military and commercial applications. [www.acincenter.org](http://www.acincenter.org)
